DETAILED ACTION

1. Applicants' response to the office action and amendment (Paper No. 11) filed on July 8, 2002 has been entered.

Response to Arguments

2. Applicant's response to the office action (Paper No.11) is fully considered and deemed persuasive in part.
3. The rejection made under 35 U.S.C. 112 second paragraph in the previous office action is withdrawn herein in view of the applicants' amendment (Paper No.11).
4. With respect to the rejection made in the previous office action under 35 U.S.C. 102(b), Applicant's arguments and amendments have been considered but are moot in view of the new ground(s) of rejection.
5. With respect to the rejection made in the previous office action under 35 U.S.C. 103(a), Applicant's arguments and amendments have been considered but are moot in view of the new ground(s) of rejection.

New Grounds of Rejections

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is indefinite and unclear for reciting 'ATH1 gene product' because it is not clear what the ATH1 refers to (i.e. does it refer to any gene product within the Arabidopsis

Art Unit: 1637

thaliana homeobox region). For art purposes ATH1 is broadly read and the gene products within that region are considered for the following rejections.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Meyerowitz et al. (USPN. 5,744,693).

Meyerowitz et al. teach a method for modifying flowering in plants wherein, Meyerowitz et al. teach that the method comprises transforming a plant with a construct comprising a sequence coding for a transcriptional factor of *Arabidopsis thaliana*, (agamous gene, equivalent to ATH1 gene product) under the control of a promoter functional in plants, wherein the gene modifies flowering in plants (see column 2, lines 17-32, column 7, lines 18-35). Meyerowitz et al. also teach that the method comprises construct with sense and antisense agamous gene product (see column 2, lines 17-25); the transformed plant produce recombinant agamous protein

Art Unit: 1637

(see column 6, lines 63-67, column 7, lines 1-2); construct comprising antisense sequence in transformed plants inhibits the said protein. Thus the disclosure of Meyerowitz et al. meets the limitations in the instant claims.

Conclusion

No claims are allowable.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suryaprabha Chunduru whose telephone number is 703-305-1004. The examiner can normally be reached on 8.30A.M. - 4.30P.M, Mon - Friday.
